ICT4ME@RHHS – BYOD (Bring Your Own Device) Program

In 2016 students in Year 7 to Year 10 will have the opportunity to participate in the ICT4ME@RHHS – BYOD (Bring Your Own Device) Program. This program allows students with an approved portable device to access the Rooty Hill High School digital curriculum through the secure Rooty Hill High School Domain. Students from Year 7 to Year 10 will be encouraged to bring an approved portable device (Laptop or convertible Tablet) to use in class for academic learning.

Students who intend to participate in the ICT4ME@RHHS – BYOD program in 2016 will be required to sign a Student Agreement.

This agreement must be returned to the school with the device details. Once approved, students will automatically have permission to bring their device for use at school using the school's wireless network infrastructure.

Details of the required minimum device specifications, suggested device types suitable for use in the school environment and the BYOD Acceptable Use Policy are available on the school website at www.rootyhill-h.schools.nsw.edu.au (under the BYOD menu).

A device can be purchased from any retailer but must meet the requirements that have been published on the minimum requirements specification sheet.

We appreciate your ongoing support.

Ms Christine Cawsey AM
Principal
